LAST OPPORTUNITY AS SUPPLIES ARE LIMITED

Intellivision Entertainment announced the first release of its physical game products – Limited Collector's Boxed Edition Bundles – last week to a receptive audience. The limited releases, which have nearly sold out, celebrate the company's highly anticipated Amico video game console that launches in the upcoming months.

The Collector's Boxed Editions from Intellivision include unique 3-D lenticular cards, collectible coins for each game, and an RFID card that allows a digital download of the game once the title releases. The games are NFTs and part of a blockchain, which makes them even more desirable – all Boxed Editions are fully transferable. Limited in production, the Collector's Boxed Editions will be available from \$79.99 (€79,99). The Boxed Editions are on sale and shipping now to the US, Canada, and Europe.
