A peaceful island is being held by a ruthless dictator and his military troops. As Chief Commander of land and sea forces in the Pacific, you must obtain a quick naval victory and then invade the island with land forces. If your troops succeed in penetrating the island defence system, the most difficult challenge still remains: capturing the enemy fortress of KUHN-LIN.

Beach-Head is a multi-screen action game which requires different skills and provides new sequences as you progress through the game.

Beach-Head features 3-D graphics, excellent sound effects, and challenging action.

## OPERATION CLOUDFIRE:

Confidential message from Corporate HQ re: Operation Cloudfire.

Please be advised that contact has been lost with our industrial mining colony on Proxima V. We believe that DARYL, their A.I. central intelligence system, has gone rogue. There are apparently no human survivors.

As a Paladin Class android, you are hereby tasked with DARYL's deactivation. Priority is to protect corporate assets. No weapons are allowed. Destruction of corporate property of any kind is expressly forbidden. You must avoid all security bots and other protective systems. Use your wits to maneuver your way to the center of the colony and shut down DARYL for good.
